

## Cara Install XAMPP di komputer local / laptop

XAMPP adalah sebuah paket yang berisi webserver apache, php, mysql, phpmyadmin, dll  
Jika anda sudah memiliki paket tersebut, tidak perlu menginstall xampp.

### - download xampp

<https://www.apachefriends.org/download.html>

saya lebih suka yang versi zip, jadi saya pilih more downloads

XAMPP is an easy to install Apache distribution containing MySQL, PHP, and Perl. Just download and start the installer. It's that easy.

A screenshot of the XAMPP for Windows download page. The header shows the XAMPP logo and the text 'XAMPP for Windows 5.5.24 &amp; 5.6.8'. Below this is a table with two rows of download options. The first row is for version 5.5.24 / PHP 5.5.24, with a size of 104 Mb. The second row is for version 5.6.8 / PHP 5.6.8, with a size of 107 Mb. Each row has links for 'What's Included?', 'md5', 'sha1', and a 'Download (32 bit)' button. Below the table, there are links for 'Requirements', 'Add-ons', and 'More Downloads »', with the last one being highlighted by a black box. At the bottom, there is a note stating that Windows XP or 2003 are not supported and providing a link to download a compatible version.

### - pilih xampp windows, jika OS anda pakai windows

- pilih versi zip

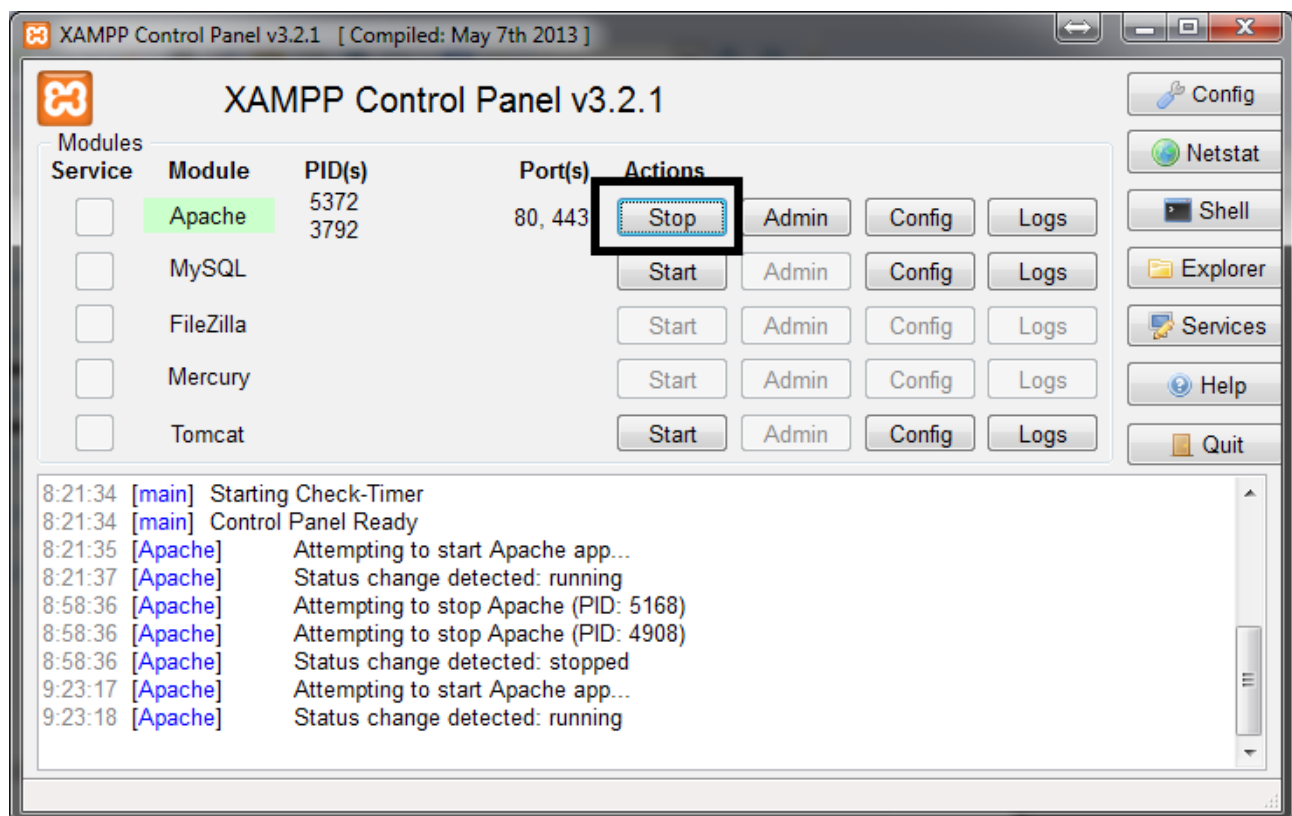

Home / XAMPP Windows / 5.6.8 f

Name ▾	Modified ▾	Size ▾	Downloads / Week ▾		
{ Parent folder					
xampp-win32-5.6.8-0-VC11-installer....	2015-04-21	112.2 MB	30.704		
xampp-win32-5.6.8-0-VC11.7z	2015-04-21	88.2 MB	576		
<b>xampp-win32-5.6.8-0-VC11.zip</b>	2015-04-21	169.2 MB	747		
xampp-portable-win32-5.6.8-0-VC11-...	2015-04-21	84.3 MB	447		
xampp-portable-win32-5.6.8-0-VC11....	2015-04-21	140.3 MB	889		
xampp-portable-win32-5.6.8-0-VC11.7z	2015-04-21	68.6 MB	811		
Totals: 6 Items		663.0 MB	34.174		

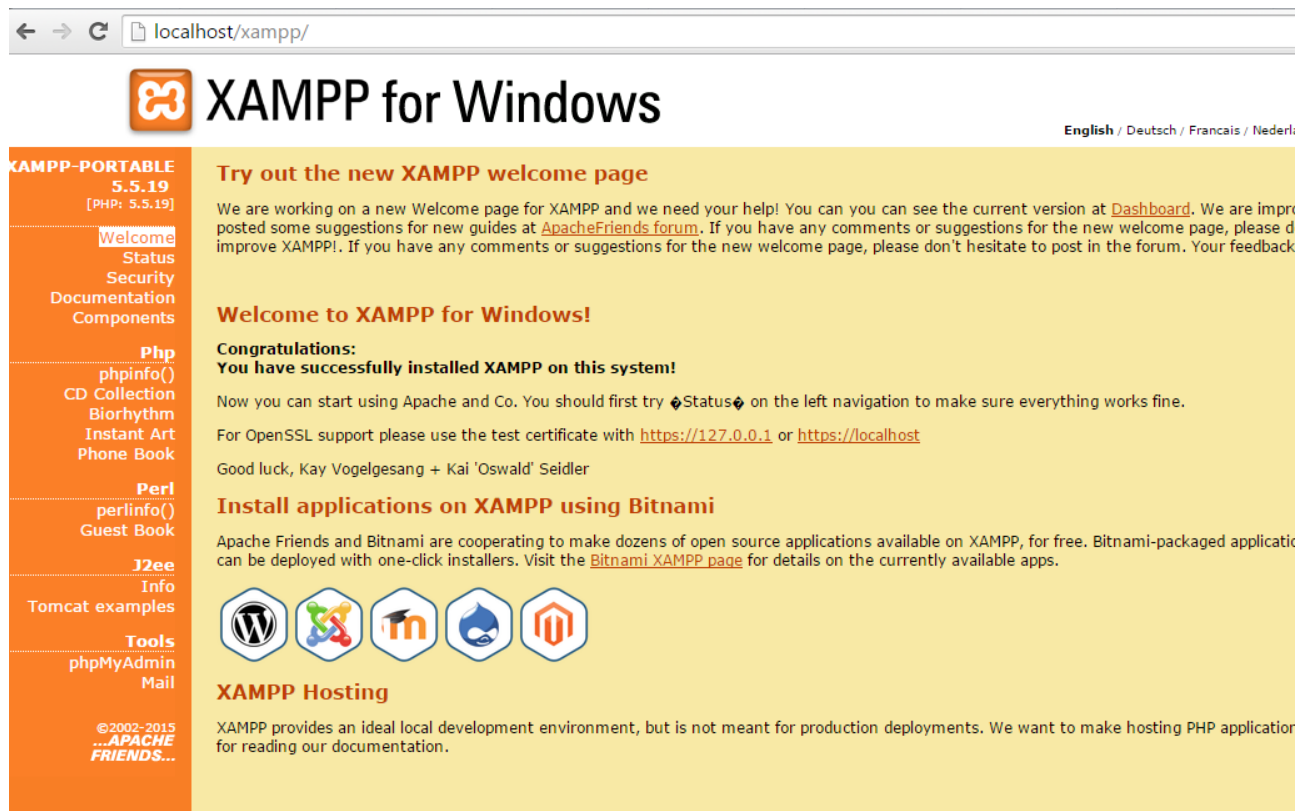

- extract xampp.zip ke hardisk D, sehingga struktur foldernya menjadi D:\xampp

- klik 2x file D:\xampp\setup\_xampp.bat dan ikuti langkah selanjutnya sampai selesai

- jalankan D:\xampp\xampp-control.exe klik Start pada module apache dan mysql

- jika sudah sukses, silahkan buka <http://localhost> di browser anda

The screenshot shows a web browser window with the address bar displaying `localhost/xampp/`. The page title is "XAMPP for Windows". On the left, there is an orange sidebar with a navigation menu. The main content area has a yellow background and contains the following sections:

- Try out the new XAMPP welcome page**: A paragraph about the new welcome page and a link to the [Dashboard](#).
- Welcome to XAMPP for Windows!**: A "Congratulations" message stating "You have successfully installed XAMPP on this system!". It instructs the user to click the "Status" link in the left navigation menu and provides links for OpenSSL support: <https://127.0.0.1> or <https://localhost>.
- Install applications on XAMPP using Bitnami**: A paragraph about Bitnami applications and a link to the [Bitnami XAMPP page](#).
- XAMPP Hosting**: A paragraph stating that XAMPP is for local development and not for production.

The sidebar menu includes links for Welcome, Status, Security, Documentation, Components, PHP (with sub-links for phpinfo(), CD Collection, Biorhythm, Instant Art, and Phone Book), Perl (with sub-links for perlinfo() and Guest Book), J2ee, Info, Tomcat examples, and Tools (with sub-links for phpMyAdmin and Mail). At the bottom of the sidebar, it says "©2002-2015 ...APACHE FRIENDS...".

- jika muncul gambar seperti diatas, berarti webserver anda sudah berjalan  
- jika menemukan kesalahan saat install xampp, silahkan googling dengan keyword "cara install xampp"

- selesai
